

Berger Construction is continuing with the installation of the storm sewer along the South side of Grand Ave. Other construction activities include fire hydrant relocation, sanitary sewer relocation and storm water relocation. Once the underground upgrades are complete the area is prepared for installation of roadway improvements. The weather has delayed the progress of the construction project. Traffic lanes have been shifted to the north side of Grand Ave. Access to all driveways, residential properties as well as businesses, will stay open throughout the construction.
