### WATER TOWER MAINTENANCE

**Lindenhurst, Illinois** – Beginning Monday, April 6, 2020, Public Works will be performing maintenance on the elevated storage tank located off of Munn Road. This work will require the isolation of the tower from the water distribution system. In doing so, we will be controlling the water distribution system from the elevated storage tank on Falling Waters Blvd. while work is performed.

Although we do not anticipate any issues with changing tower controls, it is possible that the flow patterns in the water distribution can change. These changes may cause isolated discoloration in the water and should not be experienced for an extended period of time. If you experience discoloration in your water, flush your faucets for a minimum of five (5) minutes or until clear water appears. If you experience prolonged discoloration, please contact the Village Hall for further assistance at 847-356-8252.

Work on this project will cover a span of one (1) week and should be completed by Monday, April 13, 2020. We apologize in advance for any inconvenience you may experience.
