SPRING RESTORATIONS

Lindenhurst, Illinois – Public Works will begin replacing plow-damaged sod and restoring water main repair excavation sites from this past winter, starting the week of May 18th. This work consists of removing damaged sod and/or gravel to a depth of 6 inches and placing clean topsoil. Seed and an excelsior blanket will be added to excavation sites to ensure proper growth. The excelsior blanket is biodegradable and is usually removed in 3 – 4 weeks once grass has been established. To expedite the growth; you are invited to help by watering the areas but may not be necessary with the spring rains.

Due to the required social distancing and the use of additional PPE while in public, this labor intensive work will be conducted at a slower, more cautious pace than you are accustomed to receiving. We assure you that we will address all restorations with the safety of the public and our staff in mind.

Public Works will systematically work from the south side of the Village working north. The following are locations that will be addressed. If you do not see your address, please visit www.lindenhurstil.org and enter a service request for the work. Some areas may remain unaddressed until asphalt replacement has been completed. If there are any questions, please contact the Village of Lindenhurst at (847) 356-8252.
