

6/16/2020 GRAND AVENUE CONSTRUCTION UPDATE

Berger Construction is scheduled the week of June 15th, weather permitting, to reduce eastbound traffic configuration to one lane along the south curb lane and relocate/reduce westbound traffic to one lane along the newly constructed north curb line.

A left turn lane will be established for access to roadways and certain major entrances along the route. Legally permitted U-turns will provide access to all residential and business driveways throughout the project limits.

This phase of the construction involves the construction of medians within the center of Grand Ave. Traffic signals will also be installed during this time.

Please use caution during this transition all lanes of Grand Ave will carry vehicular traffic.
